sources include kidney, liver, molasses, mushrooms, spinach, whole grains

## Energetic Toxins

You were scanned against resonating heavy metals, bacteria, viruses, molds, parasites, and chemicals. Below are those that were found, energetic in nature, which simply means there was a match to the bioenergetic pattern of that category.

- A resonating Mold/Yeast that is produced in the body, but can overgrow under specific circumstances.
- A resonating mycotoxin that is produced by some species of molds, typically found on crops. It is typically transmitted through inhalation.
- A resonating Mold/Fungi that spreads through the bloodstream from an infected body site infection.

- A resonating parasite commonly found in soil or water.
- A resonating parasite often transmitted through the consumption of a contaminated food or beverage.
- A resonating parasite often transmitted from a contaminated animal.

- A resonating virus often transmitted through close personal contact such as shaking hands, coughing, sneezing, or touching objects that may have been touched previously by an infected individual.
- A resonating virus often transmitted by ticks, mosquitoes, and other biting insects.

#### Bacteria

- A resonating bacteria commonly found in soil, water, organic matter, plants, and food products.

#### Chemicals

- A chemical commonly found in fertilizer.

#### Metals

- A resonating Heavy Metal used in various structural materials.

## Energetic Hormonal Imbalances

You were scanned to find resonating hormonal imbalances those hormones detected are listed below.

#### Hormone

- Low T4  
Thyroxine is one of the principal hormones secreted by the thyroid gland that increases the use of all food types for energy production and increases the rate of protein synthesis in most tissues.
- Low Testosterone  
A steroid hormone found in the androgen group that accelerates growth in tissues on which it acts, stimulates blood flow, and affects many metabolic activities.
- High TSH  
Secreted by the anterior lobe of the pituitary gland and stimulates the thyroid gland.
- High Cholesterol  
A sterol widely distributed and important in metabolism, cell membrane integrity, and serving as a precursor of various steroid hormones.

#### Notes

It would be ideal to have your hair and saliva samples scanned again to check your progress in roughly 4 to 6 weeks.
